

SAVITRIBAI PHULE PUNE UNIVERSITY

**S. Y. B. B. A. (C.A.) SEMESTER III
(CBCS 2019 PATTERN)**

LAB BOOK

NAME : LALIT DEVIDAS PATIL

**COLLEGE NAME: SINHGAD COLLEGE OF ARTS &
COMMERCE WARJE PUNE**

ROLL NO : 106 DIVISION: B

SEAT NO:

| | | | | |
|---|---|---|---|---|
| 1 | 3 | 2 | 8 | 5 |
|---|---|---|---|---|

ACADEMIC YEAR : 2023-24

Certificate

This is to certify that
Mr. PATIL LALIT DEVIDAS

Seat Number_____of S.Y.BBA(CA) Sem- III has
Successfully completed Laboratory course
(Angular JS) in the Year . He has scored mark out of
10 (For Lab Book).

Subject Teacher

H.O.D./Coordinator

Q1-Using AngularJS Create a SPA that show History of some(4-8) Historical Places (use MVC).

```
<!DOCTYPE html>
<html ng-app="historicalPlacesApp">
<head>
<title>Historical Places</title>
  <script
src="https://ajax.googleapis.com/ajax/libs/angularjs/1.8.2/angular.min.js"></script>
</head>
<body>
  <div ng-controller="HistoricalPlacesController">
    <h1>Historical Places</h1>
    <ul>
      <li ng-repeat="place in places">
        <strong>{{place.name}}</strong>
        <p>{{place.description}}</p>
      </li>
    </ul>
  </div>
  <script>
    var app = angular.module('historicalPlacesApp', []);
    app.controller('HistoricalPlacesController', function($scope) {
      $scope.places = [
        {
          name: 'Sinhagad Fort!',
          description: 'Situating on a hill in Pune, Sinhagad Fort has a rich history and was the site of many battles, including the famous Battle of Sinhagad. It offers panoramic views of the surrounding landscape.'
        },
        {
          name: 'Lohagad Fort',
          description: 'Lohagad Fort, situated near Lonavala, is known for its medieval architecture and historical significance. It has a fascinating history and is a popular trekking spot.'
```

```

    },
    {
      name: 'Pratapgad Fort',
      description: 'Located in Satara, Pratapgad Fort is famous
for the Battle of Pratapgad fought between Shivaji Maharaj and Afzal
Khan in 1659. The fort has historic monuments and provides stunning
views of the Sahyadri mountain range.'
    },
    {
      name: 'Raigad Fort',
      description: ' Raigad Fort, located in the Raigad district,
was the capital of the Maratha Empire under Chhatrapati Shivaji
Maharaj. The fort offers a glimpse into the Maratha history and has
several historical structures and monuments.'
    }
  ];
});
</script>
</body>
</html>

```

Slip 12

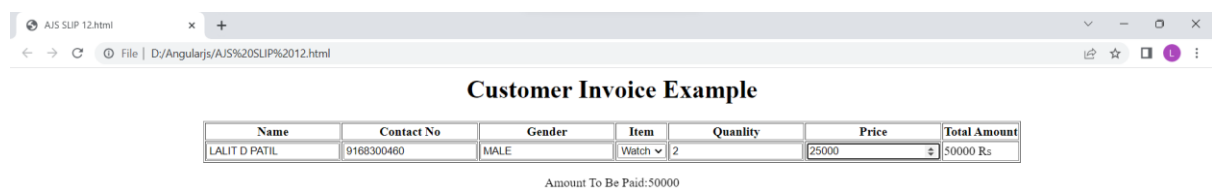

Q2-Using AngularJS Create a SPA for customer registration visiting a departmental store. Form should consists of fields such as name, contact no., gender, favourite item(to be selected from a list of items with Quantity) and suggestions. Display the Bill with total no of items selected and total amount to be paid.(use filter)

```
<DOCTYPE html>
<html ng-app="invoice">
<head>
<script
src="https://ajax.googleapis.com/ajax/libs/angularjs/1.8.2/angular.min.js"></script>
<body>
<h1 align="center">Customer Invoice Example</h1>
<section class="row" ng-controller="InvoiceController">
<center>
<table border=1>
<tr><th>Name</th>
<th>Contact No</th>
<th>Gender</th>
<th>Item</th>
<th>Quanlity</th>
<th>Price</th>
<th>Total Amount</th>
</tr>
</center>
<tr ng-repeat="item in invoice.items">
<td><input type="text" ng-model="item.name"></td>
<td><input type="number" ng-model="item.contactno"></td>
<td><input type="text" ng-model="item.gender"></td>
<td>
<select ng-model="item.favorite">
<option>Tshirt</option>
<option>Jeans</option>
<option>Watch</option>
```

```

<option>Shoes</option>
</select></td>
<td><input type="number" ng-model="item.qty"></td>
<td><input type="number"ng-model="item.price"></td>
<td>{{item.qty * item.price}} Rs </td>
</td></tr></table>
<p><center>Amount To Be Paid:{{total()}}</center></p>
</section>
<script>
var invoice=angular.module('invoice',[]);
invoice.controller('InvoiceController',function($scope){
$scope.invoice={items:[{name:"",contactno:"",gender:"",favorite:"",p
rice:0,qty:0
}]
};
$scope.total = function(){
var total=0;
angular.forEach($scope.invoice.items,function(item){
total +=item.qty * item.price;
});
return total;
};
});
</script>
</body>
</html>

```

The screenshot shows a web browser window with the title 'AJS SLIP 12.html'. The address bar shows the file path 'D:/Angularjs/AJS%20SLIP%2012.html'. The page content is titled 'Customer Invoice Example' and displays a table with the following data:

| Name | Contact No | Gender | Item | Quantity | Price | Total Amount |
|---------------|------------|--------|---------|----------|-------|--------------|
| LALIT D PATIL | 9168300460 | MALE | Watch ▼ | 2 | 25000 | 50000 Rs |

Below the table, the text 'Amount To Be Paid:50000' is displayed.

Slip 13

Q3-Using AngularJS create a SPA that accept the details of student and display mark sheet (roll_no, student_name, class, sub1, sub2, sub3, total, percentage, grade)

```
<!DOCTYPE html>
<html ng-app="studentApp">
<head>
  <title>Student Mark Sheet</title>
  <script
src="https://ajax.googleapis.com/ajax/libs/angularjs/1.8.2/angular.min.js"></script>
</head>

</body>
</html>

```

The screenshot shows a web browser window with the title 'CUSTOMER BOOKING SPA'. The address bar shows the file path 'D:/Angularjs/AJS%20SLIP%2014.html'. The page content is divided into two main sections:

Customer Booking Form

The form contains the following fields and values:

- Name: LALIT D PATIL
- Address: PUNE-41
- Contact No: 9168300460
- Gender: Male (selected from a dropdown)
- Date Of Booking: 25-10-2023 (selected from a date picker)
- Date Of Journey: 03-11-2023 (selected from a date picker)
- No of Passengers: 1
- Boarding Station: PUNE
- Reaching Station: SURAT

Below the form is a button labeled 'Generate E-Ticket'.

Your E-Ticket:

The generated ticket displays the following information:

- Name: LALIT D PATIL
- Address: PUNE-41
- Contact No: 9168300460
- Gender: Male
- Date of Booking: "2023-10-24T18:30:00.000Z"
- Date of Journey: "2023-11-02T18:30:00.000Z"
- Boarding Station: PUNE
- Reaching Station: SURAT
- Number of Passengers: 1

Slip 15

Q-5 Using AngularJS Create a SPA for Bus Ticket Reservation consisting of fields : Name, Address, contact no, source station(Dropdown list), Destination station, Date of booking, date of journey, no of passenger, name of passenger, gender of passenger etc. Display the e –Ticket.

```
<!DOCTYPE html>
<html ng-app="busReservationApp">

Slip 16

Q-6 Using AngularJS display the student details who are live in pune in Table format (using ng-repeat directive, use Array to store data, use filter).

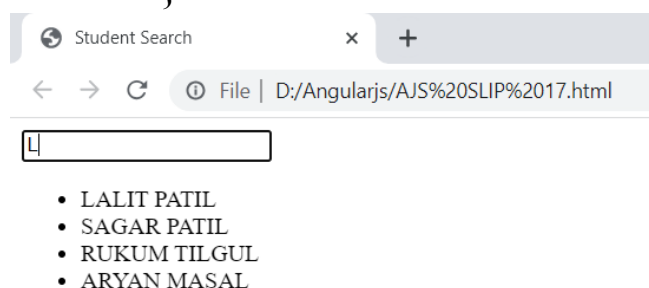

```
<!DOCTYPE html>
<html ng-app="studentApp">
<head>
  <title>Student Details</title>
  <script
src="https://ajax.googleapis.com/ajax/libs/angularjs/1.8.2/angular.min.js"></script>
</head>
<body ng-controller="StudentController">
  <h1>Student Details in Pune</h1>
  <table border="1" >
    <thead> <tr>
      <th>Name</th>
      <th>City</th> </tr> </thead><tbody>
    <tr ng-repeat="student in students | filter: {city: 'Pune'}">
      <td>{{ student.name }}</td>
      <td>{{ student.city }}</td> </tr></tbody> </table>
  <script>
    angular.module('studentApp', [])
      .controller('StudentController', function($scope) {
        $scope.students = [
          { name: 'Lalit', city: 'Pune' },
          { name: 'Rukum', city: 'Mumbai' },
          { name: 'Sagar', city: 'Pune'},
          { name: 'Rohit', city: 'Delhi' },
          { name: 'Kishan', city: 'Pune' }
        ];
      });
  </script>
</body>
</html>
```

Slip 17

Q-17 Write an AngularJS script to search student name according to the character typed and display details(use array and filter).

```
<!DOCTYPE html>
<html ng-app="studentApp">
<head>
  <title>Student Search</title>
  <script src="
https://ajax.googleapis.com/ajax/libs/angularjs/1.8.2/angular.min.
js "></script>
</head>
<body ng-controller="StudentController">
  <input type="text" ng-model="searchName" placeholder="Search
student name">
  <ul>
    <li ng-repeat="student in students | filter:searchName">
      {{ student.name }}
    </li></ul>
  <script>
    var app = angular.module('studentApp', []);
    app.controller('StudentController', function($scope) {
      $scope.students = [
        { name: 'LALIT PATIL'},
        { name: 'SAGAR PATIL'},
        { name: 'KISHAN VISHWAKARMA'},
        { name: 'RUKUM TILGUL'},
        { name: 'ARYAN MASAL'},
        { name: 'NIRANJAN SHINDE'}
      ];
    });
  </script>
</body>
</html>
```

Slip 18

Q-18 Using AngularJS create a SPA that shows Teacher Profile who are teaching SYBBA (CA) with photo.

```
<!DOCTYPE html>
<html ng-app="teacherApp">
<head>
  <title>Teacher Profiles</title>
  <script
src="https://code.angularjs.org/1.8.2/angular.js"></script>
