| > | Explain node 15 process model Wish the help of diagram |
| 14 | Mode: 15 processes User request differently as compared to a traditional Web Server. Model: Mode 15 runs in a Single process and the application Code runs in a Single thread and thereby needs less resource than Other platforms. |
| | Thread is free to serve another request |
| Regi | Single thread Start async job Cooker thread Response Response |
| Res | Ponse Internal C+++hard Pool. |
| | Process Model Using Node.js |
| च <u>।</u> | How does node se handles a file request |
| - F | Mode is handles file request by Usign its built-in sometimes which provides functions for Interacting with the file System. When a file |
| | il Receive the request: The Node is application receives a request from a Client, either through an HTTP request |
| | |

| | Date Page |
|---------|---|
| | Or any other means depending on the application's tecture. |
| | ii) Romes the request !- |
| | iiis Read the File |
| | iv) Handle the file Content |
| | r) Send response! |
| ઘ | What is the purpose of Object module exports in |
| -> | Node Je |
| | The module exports is a special object Which is included in every 1:5 file in the Mode is application by default. The module is a variable that represent the Courters module and resports is an Object that Will be exposed as a module. |
| 9.5. | Answer the following. |
| e aj | Explain Fs. readfile () method for all possible Value Of Options. |
| | Tode . 12 Uses the far readfile () method to asynchronously read the entire Contents of a file. The method accept |
| | |

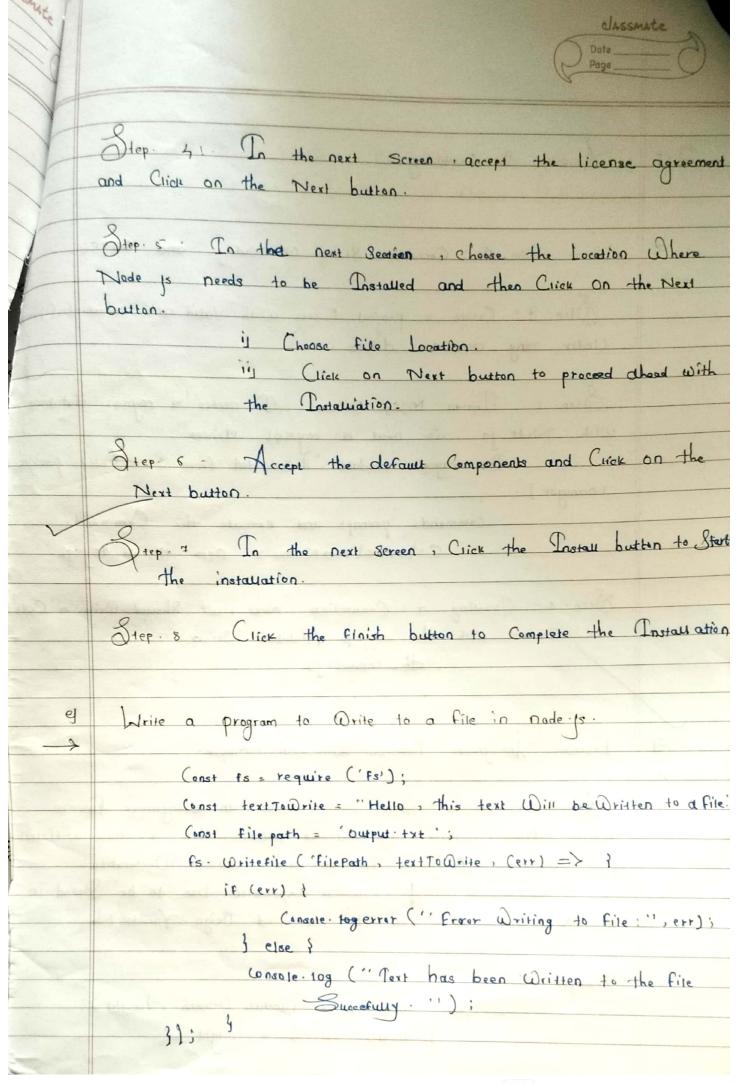

entirely in parascript and was developed by Isaac z. eter in 2010. Nem is World's Largest Software registry It is a package manager for Nodels packages and Mod present in an application &o it is basically responsible, Managing all your Node 1s packages. All nem packages are defined in Files Called package (son . The Content) OF Package. Ison Must Written in Ison. Distinct Components. 1) Website. ii) Command line Interface. iii) Registry Advantage OF NPM Is is Simpler than 80AP It is a default package Manager For Node. 13. iii NPM is Free to Use. Completely Open Sources and Written in 1.5. Create a node 19 file that Select all records from the Customers table. Var mysel = revire ('mysel'); Var Con = mysql. Create Connection (1 host : " Localhost "> User . " root " password !- " Tiger "

database: Customer 3): Con . Connect (Function (err) } if (err) throw err; Con. query (" Select * From Customer", function (err, result, fields) if (err) throw err Console · log (result); 4): 4); Answer the following I hat are different feasures Node fo? Mode 19 Asynchronous or Non-blocking nature.

Node 1s is easy to launch and Can be Used for prototyping and agile development.

Mode 12 provides fast and highly Sceleble Sorvices. Source Code Cleaner, Consitered and Steady. large environment for Open Source library. Write a program to Use 891 Select Query to Show data from table Usign node so and mysel data base. Const mysol = require ('mysol');

Const Con = mysel · Create Connection () host : "Localhost" User : "root" Password ! 'tiger " database! College. 3); Con · Connect ((err) => } if (err) throw err; (ansate log (connected to the detabase .)) 3); Con guery ('Select & From College's (err., results) => } if (err) throw err: Console - query (109 (onsole log (" Dada from the table)! (on end() Explain Step to Postall Dode & on Window. Step- 1: Go to the Site https://nodep.org/en/download/ and download the necessary binary files Step . 21. Double Click on downloaded . Ms1 file to Start the Installation · Click the run button in the first Screen to begin the installation. Step 3! In the next Screen, Click the "Next" button to Continue with the Installation.
